We help doctors and dentists just like you with vehicle leasing – here is how.

Leasing frees-up capital – the number one benefit of leasing is that you get a brand new car, without hefty up-front costs, freeing up cash to invest elsewhere in your business.

Leasing is low risk - eliminate the risks on vehicle depreciation. At the end of the contract, simply hand back the car without worrying about how much it might be worth.

With leasing, you choose - from the widest choice of cars and light commercial vehicles to meet your business needs. Opt from a Smart car to a Lamborghini, and everything else in between.

There is less admin – buying, maintenance and selling issues are taken care of by the leasing company, saving you time and money, which ultimately allows you to focus your attention on your core business.

Tax relief can be claimed - the monthly leasing payments can be offset against your taxable profits, with just an adjustment for any personal use of the vehicle.

Competitive costs – because we purchase thousands of vehicles we are able to offer better finance payments than a dealership.

Expert advice - we can advise you on the most suitable vehicles, type of funding, length of contract, anticipated mileage, tax position and how long you should keep each vehicle

24/7 support - – as a company focused business we have years of experience and dedicated experts to support you every day and you will have the reassurance of 24/7 support 365 days a year by phone, internet and email

Fast and accurate service – we pride ourselves on delivering a fast, efficient and accurate service aimed at saving you time and money.

Special offers – We get many special offers from manufacturers, which we pass on to you. But you have to act fast, as these go very quickly!

Special medical and dental team – We have a team dedicated to dealing with the special requirements of our medical and dental clients, so you'll be in good and experienced hands.
